Kipp and Wendy,

We have moved the location of the DI-1 well slightly away from the permitted location to get it further away from the neighboring home and to make it easier to drill logistically. The location of the well per the EPA permit and the location of the desired well location are now 48 feet apart. If we were to move the well to the permitted location, the move would place the well further southeast, which is closer to the nearby home. We would like to keep the well at the current location to mitigate noise during drilling if possible.

The locations of the current desired well site and the permitted well site are shown below.

Surveying information was Kennedy Jenks and their surveyor.

If I can help further, please let me know.

Patrick OBrien

Subject: Well location information

Pat-
The Permit location for well DI-1 you gave us is in Section 1 at:
517 feet from the south line, and
649 feet from the west line.

The location in the field for the well given to the surveyor in Section 1 is:
559 feet from the south line, and
626 feet from the west line.

The staked location is 42 feet north of and 23 feet west of the permit location, or 47.95 feet in a straight line.
